TRI PLY

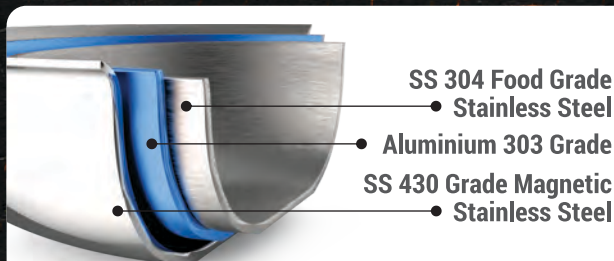

PRESSURE COOKER & COOKWARE

TRI-PLY COOKWARE CONSISTS OF THE FOLLOWING LAYERS

Interior Layer : The inner layer is usually made of AISI 304 Grade stainless steel, which is non-reactive, resistant to staining, and doesn't impart or absorb flavors from food. AISI 304 Grade Stainless steel also makes for easy cleaning.

Core Layer : The core layer is typically made of 303 Grade of aluminum, which is an excellent heat conductor. Aluminum helps to distribute heat evenly across the cooking surface, reducing hot spots and allowing for precise temperature control.

Exterior Layer : The outer layer is again made of 430 Grade of stainless steel, which provides durability and makes the cookware suitable for use on various cooktops, including induction.
